General traffic information
Information for drivers of trucks over 7.5 tons
The tunnel continues to be closed to trucks over 7.5 tons. Trucks wanting to approach via the A4 in the direction of Messegelände/Zoobrücke, are advised to use the signposted alternative route from Köln-Buchforst. Alternatively, they may use the route using the A4 to Gremberg, then via the A559 to Köln-Deutz.

Accessibility of several bridges for trucks
Several bridges in the vicinity of the Congress Centers may currently only be used to a limited extent. The Mühlheimer Brücke (Bridge) is closed to heavy vehicles over 30 tons. The Leverkusen-Rhine Bridge (A1) is closed until further notice to vehicles with a gross weight of over 3.5 tons.

Environmental Zone Cologne
Since 1 July 2014, only vehicles with the green environmental sticker may travel within the Cologne Low Emission Zone. The Congress-Centrum Koelnmesse is still accessible without a green sticker.
Probably until the end of 2015, the Kalk tunnel on the B55a between the Zoobrücke and the motorway junction Köln-Ost is being completely renovated. Throughout the entire construction phase the tunnel will only have two lanes open to traffic in each direction instead of the usual three. This will lead to traffic restrictions in the vicinity of our congress centers.

The access roads at the Köln-Ost motorway interchange from the A3 to the B55a in the direction of the city center, as well as access to the B55a from Buchheimer Ring towards the city are closed. Travelling from the North on the A3, please leave the A3 at the Mülheim exit and follow the signs to Koelnmesse. Follow the signs to Koelnmesse via the Mühlheimer Zubringer and Clevischer Ring until, shortly after passing Wiener Platz, turn right into Danzier Straße. At the T-junction turn left onto Deutz-Mühlheimer Straße, then right again into the Auenweg.

Travelling from the South on the A3, at the Heumar motorway junction take the A4. At the Gremberg interchange take the A559 in the direction of the L124 to the Eastern approach road and initially follow the Koelnmesse signs. The L124 runs into the Opladen Straße (L111). Follow this until you can turn into the Auenweg. When entering the roundabout take the second exit in the Rheinparkweg. After 200 meters you will have reached the Tanzbrunnen.
